PROFESSIONAL SUMMARY

M.S. in Business Intelligence and Data Analytics with hands-on experience turning data into decisions non-technical teams can act on. I gather requirements from stakeholders, analyze data for trends and patterns, build dashboards, and translate findings into clear, plain-language recommendations. Proposed a self-initiated retention-analytics project at Risepoint, now refining the dashboard and survey design with my manager, that surfaces overlooked student data as a driver of outreach decisions. Tools: SQL, Python, Excel, Tableau, Power BI, with a portfolio of applied analysis projects.

PROFESSIONAL EXPERIENCE

Risepoint

July 2019 to Present

Student Specialist, Data and Insights

- **Self-initiated project:** Proposed a retention-analytics project pairing qualitative and quantitative survey data with grade data, now refining the dashboard and survey design with my manager to surface gaps in student outreach.
- **Data preparation and reporting:** Clean and prepare data so ad-hoc reports run smoothly, pull recurring and one-off reports, and create reports in Salesforce for focused outreach informed by enrollment data.
- **Reporting to leadership:** Report program metrics to leadership weekly and present findings each semester for the programs I oversee, translating results into plain language for non-technical audiences.
- **Monitoring and follow-through:** Track engagement indicators across 600+ active students, flagging patterns that warrant outreach and verifying the underlying data before it reaches a decision maker.

Wiley

June 2022 to June 2023

User Experience Research Intern

- Built instructor-facing Power BI dashboards for a digital-learning product, designing each view around the questions educators actually needed to answer.
- Contributed to user research and usability studies, turning findings into design recommendations that shaped wireframes and features for educational platforms.

University of Florida

June 2016 to Dec 2018

National Science Foundation, Scholarship for Service Coordinator

- Administered a multi-million dollar NSF grant program end-to-end, managing budgets, fiscal reporting, and full regulatory compliance throughout the funding period.
- Led recruitment for an NSF-funded scholarship, connecting underrepresented PhD students to funding for cybersecurity studies.
